

PROFESSIONAL TRACK PLANNING, CONSTRUCTION AND SURFACING

QCI TRACK

QCI provides superior Track surfaces for optimal performance. Our expertise in planning and design, innovative technology, and dedicated craftsmanship makes your track surface safe, attractive, and durable.

QCI DELIVERS UNMATCHED QUALITY THROUGH...

VALUE

QCI's unique track systems are comprised of the highest grade materials, better binder and better rubber.

- All systems are comprised of IAAF certified products assuring you are getting the highest quality materials on the market yielding optimal results
- Thicker wear layer to ensure your track looks and performs better and lasts longer
- Higher percentage of binder for greater bond and tensile strength
- Technically advanced materials protect your track from ultra violet damage
- QCI provides the most comprehensive warranty in the industry
- All of this at the most competitive prices

EXPERIENCE

- Premium track systems construction and surfacing at the highest level of competition since 1999

SERVICE

- Complete, turnkey sports construction entailing on-site assessment, design/build, budget planning, and comprehensive project coordination
- Custom track systems construction based on our expert assessment of site conditions
- Unequaled service before, during, and after your project

APPLICATIONS

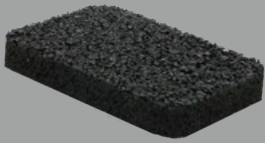

**HIGH SCHOOL AND
COLLEGE LEVEL
COMPETITIVE FACILITIES**

**MUNICIPAL PARKS AND
RECREATION FACILITIES**

OUR POLYURETHANE TRACKS PROVIDE AN INTERNATIONAL STANDARD OF PERFORMANCE.

They are faster, durable, all-purpose, and can be constructed in various layers and textures for optimal traction to meet your exact needs.

QCI offers five different polyurethane products to choose from based on your individual track requirements.

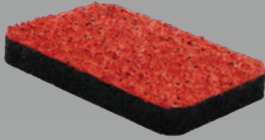

QC 100PM

13 mm, paved in place, permeable, polyurethane system
Solid black or colored rubber

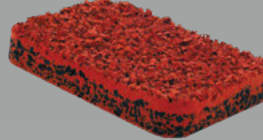

QC 1500SW

15 mm Impermeable "Sandwich" system
12 mm base mat, with squeegee applied base sealer
3 mm embedded wear coat

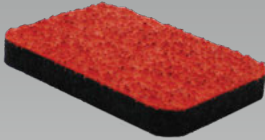

QC 200SS

Permeable base mat structural spray system
13 mm, paved in place, base mat
2 coats colorized structural spray

QC 3000FP

15 mm Collegiate level Full pour polyurethane system
3-layer flow applied polyurethane
Colored embedded rubber finish
Also offered in 10 mm option (QC 2000 FP)

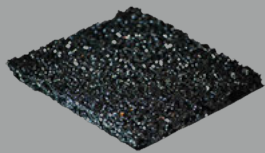

QC 300IS

Impermeable base mat structural spray system
13 mm, paved in place, base mat
Squeegee applied Base sealer
2 coats colorized structural spray

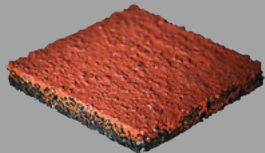

LATEX SURFACES

Our Latex tracks are constructed with high-quality latex polymers that are applied with the "Rake and Spray" installation system and bound with a water-based binder. We offer two surface depths and have two Latex products for you to choose from to build your custom track.

BLACK MAT

3/8 - 1/2 inch black mat
High quality rubber granules
Fortified Latex Binder

BLACK MAT WITH STRUCTURAL SPRAY

3/8 - 1/2 inch black mat
High quality rubber granules
Fortified Latex Binder
Acrylic structural spray

QUALITY PLAY BEGINS WITH A QUALITY SURFACE.
